Growth ongoing, valuation appeal grows

3Q26 review: higher production translates into earnings

POSCO International reported 3Q26 consolidated revenue of W9,026.8bn (+9.6% YoY) and OP of W400.7bn (+24.0% YoY; OPM 4.4%), slightly exceeding our estimate and consensus. The key highlight was earnings growth at SENEX (Australian oil and gas production subsidiary) and the Indonesian palm oil business. SENEX posted a record quarterly OP of W55.1bn (+106.4% YoY), driven by higher production and increased sales volumes linked to oil prices. The Indonesian palm oil business's OP surged 454.3% YoY to W83.7bn, supported by the consolidation of PT PAR and productivity improvements. Combined OP from the two businesses reached W138.8bn, up W97.0bn YoY, driving overall earnings growth. OP at the power generation business reached W85.2bn, supported by higher system marginal prices (SMP) and lower maintenance expenses, while earnings in the steel and materials/bio businesses declined due to FX movements. The growing earnings contribution from SENEX and the Indonesian palm oil business, which helps to cushion earnings volatility from other businesses, is encouraging. Net profit attributable to controlling shareholders of W394.9bn included one-off non-operating items, such as gains on asset disposals.

US shale gas to complement SENEX's production growth

In 2027, we expect further production increases at SENEX and initial earnings contributions from US shale gas production assets. SENEX's 3Q26 sales volume rose 55.4% YoY to 14.3bcf, while the share of sales to LNG liquefaction plants under oil-linked pricing increased to 48.5% (+15.5ppt QoQ). We expect higher production and profitability gains from rising oil prices to continue through 1H27. The company plans to complete the acquisition of US shale gas production assets at end-November and begin operations thereafter. OP from the shale assets will likely expand from W36bn in 2027 to W80bn in 2028 and to over W100bn annually thereafter. Gwangyang LNG Terminal 2 is set for completion by year-end, expanding storage capacity by 43%, while shipments under the Cheniere long-term contract also began initial loadings in October. We expect the foundation for LNG business expansion to strengthen in 2027 as the new storage facilities come online and long-term procurement volumes are actively utilized.

2027 OP estimated at W1.65tn; undervalued relative to growth

We estimate 2027 consolidated revenue at W38.37tn (+9.2% YoY) and OP at W1.65tn (+12.5% YoY). Additional growth opportunities also exist. Talks to acquire E&P development assets in Southeast Asia are ongoing. We expect them to conclude between end-2026 and 1H27. Alaska LNG could also provide mid- to long-term momentum, with US-Korea strategic investment talks being added to existing equity investments and cooperation in steel supply/LNG procurement. The company is currently reviewing a 2027 investment budget of about W2tn, which will be split equally between follow-on investments for existing businesses and new businesses. While earnings growth is expected to continue up to 2028, shares currently trade at a 2027E P/E of just 7.8x. Given the sustainability of profit growth and additional business opportunities, we believe shares are currently undervalued. We maintain BUY and our target price of W112,000.
